

Dear MSC/J&L Metalworking and Tool, Die & Machining Association of Wisconsin,

I would like to thank you all for generous donation. I promise to put the Kennedy Toolbox to great use, and I don't have to share a toolbox with another guy anymore. My name is Kolin Knoblauch and I am a full time student at Moraine Park Technical College. I am also an intern with the MGS Manufacturing Group. At Moraine Park I am currently studying CNC/Tool and Die Technologies. I have not yet made a decision toward which field I would prefer to go into, but I know either field would be a good fit for me. After I graduate I hope to get an apprenticeship through MGS, or another good company. After I go through my apprenticeship I hope to continue my learning by doing CMM, EDM, programming, design and whatever else I get into. After all that I definitely want to open up my own shop somewhere.

So again I greatly appreciate your donation and I thank you very much.

Kolin Knoblauch
